

Capabilities Statement

Core Competencies

As a business development specialist, Dualos partners with the largest and most respected Test & Measurement Instrumentation and Control, Avionics Test and Simulation and Mil/Aero RFCommunications Test and Assurance solutions to deliver the best value to our customers.

Established 12 years ago, Dualos provides guidance and leadership in supply chain management and risk mitigation through managed workflow and oversight. Dualos has the financial strength to manage any level of purchase supported by a robust infrastructure enabling us to serve as a prime, sub-prime or centralized supplier consolidator.

Past Performance

Past performance is an excellent indicator of future success. Dualos strives for 100% quality in all we do by constantly reviewing and improving QMS processes with relentless scrutiny. Customers continue to recognize Dualos as; Excellent, Superior, Outstanding, and Gold within their respective Supplier Quality Management Systems.

Differentiators

Through thought leadership, leveraging Dualos' deep domain subject matter expertise, we take an engineering consultative approach to support R&D efforts through production and maintenance.

Dualos has established itself as a proven program acquisition management organization driving unneeded cost out of the supply chain through supplier management, PO consolidation, vendor consolidation, kitting, integration and warehouse staging. Leveraging electronic workflow and e-commerce solutions Dualos provides customers with real-time information from PO through product delivery, flanked with key performance indicators eliminating potential risk from the supply chain. Dualos works closely with Programs and Buyers revealing future demand and predictability. Customers and OEM partners alike rely on Dualos for order management, transparent communications and supply chain management resulting in exceptional Supplier Score Cards.
